

MOHSAN ALI

Full-Stack Developer (React / Next.js)

Lahore, Pakistan | +92 303 787 4324 | chmohsanali10@gmail.com | linkedin.com/in/mohsan-alii

PROFESSIONAL SUMMARY

Full-Stack Developer (React / Next.js) with 1+ year of professional experience building responsive React.js and Next.js applications, customizing Shopify stores, delivering WordPress business sites, and engineering browser automation workflows with Puppeteer and Playwright. Experienced in full-stack systems with authentication, role-based access, and database-backed admin dashboards (Supabase, Prisma, NextAuth.js). Also handle on-page SEO and have led a small team of interns. Built an AI-powered Wheat Disease Detection system (TensorFlow + Flask) as a final year project, recognized by the university department. Available immediately for remote roles.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, Tailwind CSS, HTML5, CSS3, Responsive Design, REST APIs

Backend & Auth: Supabase (Auth, PostgreSQL, Row-Level Security), Prisma, NextAuth.js, Neon Postgres, Flask, Node.js, REST API Design

Automation: Puppeteer, Playwright, Web Scraping, Workflow Automation

E-Commerce & CMS: Shopify Theme Customization, Liquid, WordPress, UI/UX Optimization

SEO & Marketing: On-Page SEO, Keyword Research, Backlink Building, Google Search Console, Site Audits, Meta Ads

AI / ML: TensorFlow, CNN, Python

Tools: Git, GitHub, Vercel, VS Code, Chrome DevTools

EXPERIENCE

Frontend & Automation Developer – Prism Tech International

Oct 2025 – Present

Shopify · React.js · Next.js · Supabase · Puppeteer · WordPress · SEO

- Customized 10+ Shopify storefronts using Liquid, HTML, and CSS, delivering pixel-perfect, brand-aligned UI on schedule for each client.
- Designed and built full-stack systems on Next.js and Supabase, implementing authentication, role-based admin access, and PostgreSQL-backed dashboards for client tools.
- Built Puppeteer-based automation scripts that eliminated repetitive web workflows, saving clients 5–10 hours/week in manual effort.
- Diagnosed and resolved UI/UX issues across e-commerce stores, improving layout alignment, mobile-first responsiveness, and visual consistency across devices.
- Built and maintained a WordPress site for a supply chain company: page copy, navigation, multi-country WhatsApp contact button, plus DNS and Google Search Console setup.
- Run SEO for e-commerce and corporate sites: store audits, keyword and collection optimization, and backlink / guest-post outreach.
- Led a team of 3 interns (development and SEO) for 3 months, training them on backlink building and tracking progress through monthly performance reports.
- Collaborated directly with international clients to gather feedback, iterate on designs, and deliver results on tight deadlines.

PROJECTS

Kreativ Icon Virtual Academy Website (Saudi Arabia)

2026

Next.js · TypeScript · Tailwind CSS · Prisma · NextAuth.js · PostgreSQL

- Building a new website for an international client, a Riyadh (Saudi Arabia)-based online academy offering school grades, O/A-Level, and IT and language courses, with a premium glassmorphism UI and a custom brand color palette.
- Built a role-based admin panel (super admin / admin) using NextAuth.js, Prisma, and Neon Postgres, with Courses and Faculty management connected to the public pages.

- Presented two design directions to the client for approval before committing to the full build.

Internal Order Tracking System

2026

Next.js · Supabase · PostgreSQL

- Building a custom internal order-tracking system for a client, using Next.js on the frontend and Supabase for authentication and database.
- Designing the schema and access rules for order status tracking, user roles, and audit history.

Frontend Automation & Scraping Toolkit

2025

React.js · Puppeteer · Playwright · Node.js

- Built a modular automation toolkit with a React.js dashboard that allows users to trigger, monitor, and visualize Puppeteer/Playwright job results in real time.
- Implemented automated data-extraction pipelines scraping structured data from web sources and exporting to JSON/CSV, covering price monitoring, lead collection, and form automation.
- Designed for real client use cases including screenshot pipelines, form auto-submission, and competitive price tracking.

AI Wheat Disease Detection Web App

2024 Final Year Project

Flask · TensorFlow · CNN · Python · HTML/CSS/JS

- Trained a CNN on 14,000+ labeled images across 15 disease classes, achieving high classification accuracy recognized by the university department for applied ML integration.
- Integrated the trained .h5 model into a Flask REST API and built a custom frontend for image upload, real-time prediction, and diagnosis history tracking.
- End-to-end full-stack project: data pipeline → model training → production web interface.

EDUCATION

B.Sc. Computer Science University of Management and Technology (UMT)

Graduated 2025

Coursework: Software Engineering, Data Structures, Machine Learning, Web Technologies, Database Systems

ADDITIONAL

Languages: English (Professional), Urdu (Native) **Availability:** Immediately available for full-time and remote roles

Interests: Frontend architecture, browser automation, full-stack web apps, SEO-friendly development, AI-powered web applications
